Collection 2011

The Company

Years of Experience

With over 50 years of experience in the production of shoes, APIN today belongs to the most significant manufacturers of the West African market. Being a shoe specialist, we not only have excellent insider-knowledge with respect to market requirements, but we are furthermore also able to optimally adapt composition and design of all materials to the respective needs. The best in quality, ultimate flexibility, and maximum reliability in delivery and performance safeguard the international success of APIN, Nigeria.

Flexible Production

More than 1.6 million pairs of shoes daily – these figures speak for themselves! Independent production circuits, gigantic production areas, as well as sufficient „manpower“ for manual production steps facilitate high flexibility for APIN along the complete line of production – absolutely according to the needs of the customers. At the same time, our international management is always making sure that worldwide standards are met in the social field and in environmental protection.

Full Service & Good Prices

Service is the most important issue for APIN: beginning with proficient support regarding every aspect of the shoe to be developed, onward to a high-quality and an economic standard of production with short delivery times, up to extensive after-sales servicing. However, APIN's closeness to the customer also includes being nearby: short distances to international trade centers, as well as interesting tax advantages, make APIN the most attractive partner in the field of plastic shoes.

Best Quality & Design

A rundown of APIN-facts:

- long-standing experience
- highest product quality
- maximum flexibility and customer-orientation
- reliability in delivery and performance
- ecologically optimized production process
- attractive prices
- short delivery times and short distances
- extensive after-sales services

APIN always develops shoes according to international standards, either in the company's own design department, or in cooperation with designers from a variety of nations: our goal is the highest level of quality and design at all times. Strictest quality controls in the selection of materials and processing by a qualified staff create the basis for the customer's trust in us, and also for our success as one of the main suppliers of the West African market.

An almost unlimited variety of materials and colours, combined with the most individualistic variants of design – this potential joins all models of the APIN-Collections together. Ranging from classic bathing shoes up to witty street shoes with smart and unusual details: even the most extraordinary design ideas can be turned into reality.

APIN, the alternative to existing trade structures

embedded and thermoformed EVA and rubber insole - outsole

FG-10076 / 100% Rubber upper
printed EVA and rubber sole

Beach and leisure shoes for elevated tastes. The play of diverse materials such as plastic, cork and fabric in combination with the successful mix of colours has given a rise to a multifarious collection. Individual details make these shoes particularly unique: starting with refined accessories such as pearl applications, flowers and fancy yarns, through to an exciting fringe look, absolutely no limits have been set for the creativity of this collection.

Strikingly attractive are the embossed or fabric-covered foot-bed surfaces as a particular detail – even “backstage”.
